

PRESS RELEASE

Triple multi-purpose shredder BP 8402 PRO

A new model in KUHN's shredder range!
Introducing the **BP 8402 PRO** triple multi-purpose shredder.

KUHN presents its new triple multi-purpose shredder, the BP 8402 PRO, designed to work in crop residues, cover crops, and grassy areas.

This new triple combination is currently in its development stage. It is being designed to push boundaries in terms of efficiency and strength, and to save time on maintenance. It features a larger-diameter rotor which can rotate faster to produce higher quality shredding.

With an 8.40-metre working width, this model is ideal for large farms and contractors looking for fast work output with tractors up to 380 hp.
